

Color theme

--- lets change the entire color theme to Crest-based-color theme :

- Black — dominant shield background
- Yellow/Gold — the bright yellow sections of the shield
- White — the eagle, gear, book, and banner
- Red — the flame (small but distinctive)

Here's my reasoning in a nutshell:

It's authentically CCTI. The colors come directly from your school's identity — established since 1955. No other school's website will look like yours.

It's bold and high-contrast. Black and gold is one of the strongest color combinations in design. Text is highly readable, sections are visually distinct, and it photographs well in screenshots.

The navy theme, while good, is generic. Many universities and institutions use navy + gold. It's safe but forgettable. The crest theme is memorable.

Red gives you a powerful CTA tool. Used sparingly on "Apply Now" or "Contact Us" buttons, it draws the eye exactly where you want it — without clashing.

Attached (index.html) is an example of the color theme. ---
